NISHKIAN CHAMBERLAIN MONTHLY NEWSLETTER JULY 2015

The kids are out of school, traffic is a "little" lighter and the long awaited plans for a summer vacation are now being realized. It's summer after all and many are taking family vacations so what better time to highlight the hotel and resort construction market! Earlier in July we highlighted the recent upswing in [Hospitality work](#) throughout our practices.

Whether it is a new ground up hotel like the one we designed in [Santa Cruz for a new Courtyard Marriott](#) or additions to existing resorts like the new pool and bar at [Terranea Resort](#) in Rancho Palos Verdes, Nishkian Chamberlain has been hard at work on numerous hospitality projects throughout California. Stay tuned for future posts on a feature 300 key hotel with some interesting structural challenges that our

team is currently working on.

While summer is in full swing and hospitality has been on our minds, our monthly newsletter explores a variety of interesting topics going on throughout our offices. Learn more about our leadership tackling multiple Ironman triathlons, our offices connection to the recent New Horizons satellite flyby of Pluto, and the Cascadia Subduction Zone's potential impact on our community.

Be sure to visit our website for regular updates and trend news and share this newsletter with a colleague by clicking the link at the bottom of the page. Happy reading!

[Understanding the Cascadia Subduction Zone and Our Work to Prevent Damage](#)

Despite the fact that just a few decades ago, nobody even knew it existed, this earthquake is a very real threat to our region and, as structural engineers, our team is well aware of the type of damage a natural event of this scale could cause to local structures. Learn more in this article.

[Indigo Redwood City Tops Off in Under Nine Months](#)

Nishkian Menninger is proud to have worked with such a great team on this exciting project. While designing the structure, the team was always thinking of the contractor in order to obtain a beautiful building without creating constructability issues that can slow projects down.

[Reshore Design For Concrete Buildings](#)

How many levels of reshore are required for my project? How quickly can I strip my formwork? What is reshoring? Find the answers in this article.

Gearing Up For Ironman

All of us here are incredibly proud of Kevin, Ty, Craig, Nathan, and all that they have achieved. The dedication of these Nishkian leaders to the sport, and their relentless efforts make them effective mentors and role models in the workplace as well.

The Hotels and Resorts Market is Busy!

Nishkian Chamberlain engineers collaborate diligently with Hospitality owners and design teams to ensure the desired aesthetic environment is attained utilizing cost effective creative structural solutions.
